

About Skillcraft Internship

The Skillcraft Internship is a practical program designed to empower students with real-world web development experience. During the internship, participants learn HTML, CSS, and JavaScript through guided projects, workshops, and one-on-one mentorship. Interns build responsive websites, practice UI/UX design principles, and prepare for industry-level challenges while gaining exposure to modern tools and best coding practices.

Personalized Learning

Customized learning paths tailored to your interests and strengths. This feature ensures each intern masters the skills most relevant to their goals.

Career Guidance

Access to mentorship, resume building, interview tips, and career roadmaps to prepare for jobs in the tech industry.

Stay updated with curated scholarships and funding opportunities that match your academic and career profile.

Skill Development

Hands-on coding sessions, peer collaboration, and continuous learning help you sharpen your technical and soft skills.
